GLOBAL INSTITUTE FOR
DIGITAL COMPETITIVENESS

TECHNOLOGY FOR INCREASE EFFICENCY

Just one goal, Create value with technology.

Through 5 different specific strategies:

- 1** Spreading and encouraging the use of technologies to increase the efficiency of organizations from all over the world
- 2** Connecting organizations and executives to create more value, sell more in an omnichannel, and geopolitically fragmented world.
- 3** Work together with authorities and institutions to remove barriers to technologies and trade
- 4** Bring experts, knowledge and cases to communities or regions with little access to technological knowledge and digitalization to make opportunities inclusive.
- 5** Establish Committees by type of technology to share uses, applications, as well as groups that want to interact, collaborate and test new applications in the practical field.
