ROBOTICS**

Designed as an assistant for doctors, Grace is equipped with sensors, including a thermal camera to detect a patient's temperature and pulse, to help doctors diagnose illness and deliver treatments.

The android is a companion for patients, too. Specializing in senior care, Grace speaks three languages - English, Mandarin, and Cantonese - and can socialize and conduct talk therapy.

These robots are revolutionizing healthcare

Robots are revolutionizing the healthcare industry with increased precision and diagnostics power. Changli General Hospital, pictured, employs more than 50 robots to help care for patients. **Scroll through to see more innovative robots reinventing healthcare.**

Robots like Grace are intended as a support for medical professionals rather than a replacement, says Hanson Robotics founder and CEO David Hanson.

"Using AI and robotics in this context can help gather important data for healthcare

TECHNOLOGY FOR INCREASE EFFICENCY

Just one goal, Create value with technology.

Through 5 different specific strategies:

- 1** Spreading and encouraging the use of technologies to increase the efficiency of organizations from all over the world
- 2** Connecting organizations and executives to create more value, sell more in an omnichannel, and geopolitically fragmented world.
- 3** Work together with authorities and institutions to remove barriers to technologies and trade
- 4** Bring experts, knowledge and cases to communities or regions with little access to technological knowledge and digitalization to make opportunities inclusive.
- 5** Establish Committees by type of technology to share uses, applications, as well as groups that want to interact, collaborate and test new applications in the practical field.
